

DS3608-HD/DS3678-HD CORDED AND CORDLESS ULTRA-RUGGED BARCODE SCANNERS

BATTLE CARD

ZEBRA GLOBAL SERVICES

Zebra OneCare increases device availability, keeping DS3600 devices where they provide the most value – in the hands of workers. Refer to [Solution Builder](#) for more information:

Zebra OneCare Essential

Covers normal wear and tear and Comprehensive Coverage; Depot repair with 3-day in-house turnaround time; provides full access to technical support resources and software releases.

Zebra OneCare Select

Builds on OneCare Essential, offering advanced replacement of devices needing repair; service dashboard; 24/7 Level one support and more.

DS3608-HD/DS3678-HD Ultra-Rugged Scanner

UNSTOPPABLE PERFORMANCE FOR HIGH-DENSITY 1D/2D BARCODES

When your customers need to capture the small and dense 1D and 2D barcodes common in electronics and medical equipment manufacturing, the corded DS3608-HD and cordless DS3678-HD deliver – with unmatched rugged design, scanning performance and manageability. Advanced scanning delivers lightning-fast capture of any 1D or 2D barcode printed directly on product components or on labels in virtually any condition — or displayed on a screen. As the most rugged scanners in their class, the DS3608-HD/DS3678-HD are practically indestructible. And, if your customers want cordless freedom, the Bluetooth DS3678-HD model provides a superior experience – with an industry-leading rugged cradle, a Bluetooth connection that won't interfere with the Wi-Fi infrastructure; and a smart battery for better battery management. The result? The unstoppable performance your customers need to maximize workforce productivity and prevent unplanned production line downtime.

KEY ATTACK POINTS

Unsurpassed indestructibility

The DS3600 series are our most rugged scanners yet; the DS3608-HD/DS3678-HD feature more rugged specs than any other device in their class:

- Industry-leading 8 ft./2.4 m drops to concrete — 23 percent more durable than any other scanner in this class.
- Operates reliably after 5,000 tumbles, simulating the real-world tumbling that occurs with a drop.
- Dustproof, sprayproof and the only device in its class to be waterproofed to IP67 — withstands sprays of jetting water and can be submersed in water for up to 30 minutes.
- The cordless DS3678-HD features a rugged 'go anywhere' cradle with IP65 sealing, the same extreme temperature rating as the scanner, plus industrial charging contacts that can last 250,000 insertions.

Superior scanning performance on any high density 1D/2D barcode:

This advanced imager delivers first time capture of high-density 1D and 2D barcodes printed on labels or directly on product components — including tiny and dense 3 mil codes that are barely visible to the naked eye. These scanners also capture standard printed barcodes in virtually any condition — damaged, dirty, poorly printed or under shrinkwrap. This dual functionality provides excellent value: your customers get one scanner they can use on

the production line for end-to-end track and trace of materials — and in the warehouse from receiving to shipping.

Complimentary, industry-best management tools

Remotely configure scanners, upgrade firmware, format data properly for the back end and monitor PowerPrecision+ battery statistics and more with 123Scan² and Scanner Management Service (SMS).

Processes up to 20 barcodes simultaneously

One press of the trigger captures the right barcodes and applies the unique data format required for each one for instant transmission to your customers' backend systems.

Cordless technology in a class of its own

The DS3678-HD is the only device in its class to support Bluetooth 4.0 (Low Energy) for lightning fast communication and maximum energy efficiency. Our Zebra Wi-Fi Friendly Mode eliminates the wireless interference that Bluetooth devices often create in a Wi-Fi environment. And, the first-in-its-class battery 'charge gauge' and Bluetooth status LED make it easy to monitor remaining power and Bluetooth connectivity.

Unparalleled battery management (DS3678-HD)

The PowerPrecision+ battery delivers the ultimate in battery power and management. Your customers get 50 percent more battery capacity compared to competitive models, plus visibility into a wealth of battery health-related data, including charge cycles consumed, current battery status and a State of Health meter.
