

# DS3608-HP/DS3678-HP CORDED AND CORDLESS ULTRA-RUGGED BARCODE SCANNERS

## BATTLE CARD

### ZEBRA GLOBAL SERVICES

Zebra OneCare increases device availability, keeping DS3600 devices where they provide the most value – in the hands of workers. Refer to [Solution Builder](#) for more information:

#### Zebra OneCare Essential

Covers normal wear and tear and Comprehensive Coverage; Depot repair with 3-day in-house turnaround time; provides full access to technical support resources and software releases.

#### Zebra OneCare Select

Builds on OneCare Essential, offering advanced replacement of devices needing repair; service dashboard; 24/7 Level one support and more.

## DS3608-HP/DS3678-HP Ultra-Rugged Scanner

### UNSTOPPABLE PERFORMANCE ON 1D/2D BARCODES AT LONGER DISTANCES — PLUS OCR, PHOTOS AND DOCUMENTS

When your customers need to capture 1D and 2D barcodes, OCR, photos and documents, the corded DS3608-HP and cordless DS3678-HP high-performance imagers deliver – with unmatched rugged design, scanning performance and manageability. Advanced scanning delivers lightning-fast capture of any 1D or 2D barcode to nearly 7 ft./2.1 m away, regardless of whether it is printed on a label in virtually any condition, or displayed on a screen. As the most rugged scanners in their class, the DS3608-HP/DS3678-HP are practically indestructible. And, if your customers want cordless freedom, the Bluetooth DS3678-HP model provides a superior experience – with an industry-leading rugged cradle, a Bluetooth connection that won't interfere with the Wi-Fi infrastructure; and a smart battery for better battery management.

### KEY ATTACK POINTS

#### Unsurpassed indestructibility

The DS3600 series are our most rugged scanners yet and the DS3608-HP/DS3678-HP feature more rugged specs than any other device in their class:

- Industry-leading 8 ft./2.4 m drops to concrete – 23 percent more durable than any other scanner in this class.
- Operates reliably after 5,000 tumbles, simulating the real-world tumbling that occurs with a drop.
- Dustproof, sprayproof and the only device in its class to be waterproofed to IP67 – withstands sprays of jetting water and can be submersed in water for up to 30 minutes.
- The DS3678-HP features a rugged 'go anywhere' cradle with IP65 sealing, the same extreme temperature rating as the scanner, plus industrial charging contacts that can last 250,000 insertions.

#### Unmatched scanning performance:

The advanced imager reads 1D and 2D barcodes displayed on a screen or printed on a label faster and with 30 percent more working range than similar models in this class, delivering extraordinary productivity. Workers get first time capture of virtually every barcode, even if it is damaged, dirty, poorly printed or under shrinkwrap.

#### Capture OCR, photos and documents

With Zebra's intelligent document capture we take photos and sharpen and correct the images so they are easier to read. And support for multiple OCR fonts enables fast and easy transfer of data.

#### Complimentary, industry-best management tools

Remotely configure scanners, upgrade firmware, format data properly for the back end and monitor PowerPrecision+ battery statistics and more with 123Scan<sup>2</sup> and Scanner Management Service (SMS).

#### Processes up to 20 barcodes simultaneously

One press of the trigger captures the right barcodes and applies the unique data format required for each one for instant transmission to your customers' backend systems – for unparalleled efficiency.

#### Cordless technology in a class of its own

The DS3678-HP is the only device in its class to support Bluetooth 4.0 (Low Energy) for lightning fast communication and maximum energy efficiency. Our Zebra Wi-Fi Friendly Mode eliminates the wireless interference that Bluetooth devices often create in a Wi-Fi environment. And, the first-in-its-class battery 'charge gauge' and Bluetooth status LED make it easy to monitor remaining power and Bluetooth connectivity.

#### Unparalleled battery management (DS3678-HP)

The PowerPrecision+ battery delivers the ultimate in battery power and management. Your customers get 50 percent more battery capacity compared to competitive models, plus visibility into a wealth of battery health-related data, including charge cycles consumed, current battery status and a State of Health meter, which identifies if batteries are healthy and holding a full charge, no longer holding a full charge, or at end of life and require replacement.
